## Finding money

Use this chart to list some of the things that you buy often.
Note how often you buy them in a month. Put down how much they usually cost ("average price"). Then figure out how much you spend on them in a month. Some examples might include:

- Public transit fare or parking
- Meals out
- Clothes or personal items
- Coffee or tea
- Movies or videos on demand
- App purchases
- Snacks or junk food
- Cigarettes and alcohol
